

Read what educators have to say about Student Resources

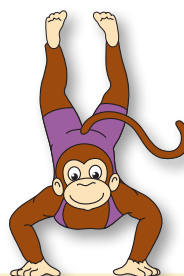

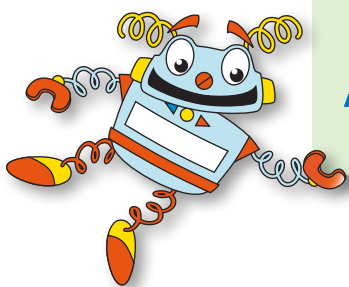

"Student- and teacher-friendly!"

"Quickcheck Math is a wonderful addition to our existing math program."

"Quickcheck Math addresses differentiated learning styles."

"My students like colourful books and being able to check and correct their answers."

"It starts great conversations in math with kids."

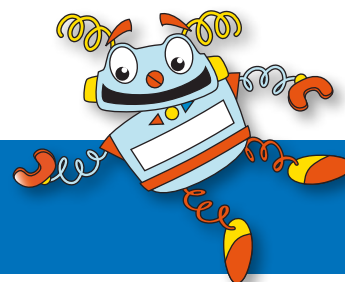

"Students worked in pairs so there was meaningful math dialogue and discussion without teacher prompting."

"Quickcheck Math promotes team work as students work together to solve problems."

"Students love it! They don't understand all the questions, but enjoy figuring them out."

"Students enjoy the hands-on and visual stimulation."

Read what teachers have to say about the Assessment Resources

"Easy to use and administer."

"I like the program for ongoing assessment for weaker students so I can see where they have the most need or just where we need to concentrate."

"It helped me make the link with proper questions and strategies. It's great reinforcement for teachers."

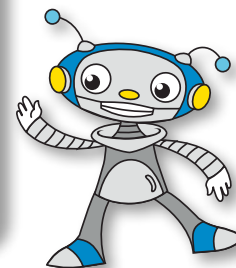

"Students follow my instructions and the assessment gave me a clear indication of the way they are thinking and what they do to measure time."

"Student Observation Sheets with suggested questions are a great way of recording student thinking when problem-solving."

"I pulled Student Observation Sheets into interviews with parents."

"I have really enjoyed using Quickcheck Math with my students. I believe that it is an excellent tool and I back it 100%. Keep up the good work!"
